

TECHNICAL COMMUNICATION: SECURESYNC V3.2.1 IMPLEMENTATION

This document outlines the new security protocol for TechCorp SecureSystems. All departments must adopt SecureSync v3.2.1 by 2024-10-15. Key changes include: 1) Mandatory two-factor authentication for admin roles 2) Encrypted audit log retention (7 years maximum) 3) API access revoked for legacy integrations

COMPLIANCE VERIFICATION: IT teams should complete their system inventory audits by 2024-08-30. Non-compliant systems will be automatically quarantined. Support tickets for this migration should be escalated via the dedicated portal at techcorpsec.com/SecureSync.

TRAINING RESOURCES are available in the SecureLearn LMS under category 'Security Protocols 2024'. Final test scores must reach 95% or higher to maintain certification.

INCIDENT REPORTING: Any system anomalies must be logged in the SIEM within 2 hours of detection. Contact your regional compliance officer for immediate resolution.
